Subject: Available for a short call on Monday?
Date: Thursday, May 29, 2014 12:20:28 PM

Joe,

Are you available for a short call on Monday? We have just a few more questions, including these listed below:

1. Comparing the data you provided on 5/2/2014 and 5/13/2014, we observed apparent data entry errors. Please specify which values for mercury Chem Precip Effluent are correct.

Date	5/2/2014 dataset (Hg, ng/L)	5/13/2014 dataset (Hg, ng/L)
12/20/2011	122	12.2
1/3/2012	424	42.4
2/2/2012	144	14.4
2/21/2012	170	17

2. What is the cause for elevated mercury concentrations for Chem Precip Effluent on the following dates?
 - a. 2/28/2012 (1520 ng/L)
 - b. 3/13/2012 (1160 ng/L)
 - c. 3/20/2012 (1710 ng/L)
 - d. 3/27/2012 (1320 ng/L)
 - e. 4/3/2012 (3400 ng/L)
 - f. 6/5/2012 (830 ng/L)
3. We noticed dates for Method 245.1 (mercury) data and Method 200.8 (arsenic) data changed between your original spreadsheet provided 2/20/2014 and the updated spreadsheets provided 5/2/2014 and 5/13/2014. Specifically, the 2/20/2014 spreadsheet shows the 245.1 and 200.8 data on 12/18/12, 1/4/13, and 1/8/13; the 5/2/2014 spreadsheet shows these data on 11/29/12, 12/19/12, and 12/21/12. Which dates are correct?
